

[MICAC25] Minutes Week 8

Giovanni Menon Raphael Toubol Christopher Nyandoro

28th April - 12th May 2025

Abstract

This document provides a summary of the meetings that have taken place during the eighth week.

Summary

First Meeting

In the first meeting, our aim was to discuss the missing functionality for the interim submission. We define and split the task for each component of the group. The tasks are as follows.

- Rules validation for the Code Scan component;
- PDF Report draft generation;
- Error Handling and Dependencies Scanner database change;
- Report Writing.

Second Meeting

In the second meeting, the team discussed the progress of the task assigned the previous week. We define possible improvements for the report structure, while an initial test and evaluation of the tool were carried out in preparation for the **Interim Submission**.
